PDF. About these proceedings. Introduction. This book constitutes the refereed proceedings of the 17th International Conference on Model Driven Engineering Languages and Systems, MODELS 2014, held in Valencia, Spain, in September/October 2014. The 41 full papers presented in this volume were carefully reviewed and selected from a total of 126 submissions. The scope of the conference series is ...

Model-Driven Engineering Languages and Systems

The capability modeling and simulation (M&S) supplies for managing systems complexity and investigating systems behaviors has made it a central activity in the development of new and existing systems.

On the other side, model-driven software development is closing the gap among business requirements, designs and executables by using domain-specific languages with custom-built syntax and semantics. It focuses on using modeling languages as programming languages.

Combining general purpose languages and domain specific languages for Model Driven Engineering April 15, 2008 Johan Den Haan 7 comments In a previous article about Model-Driven Engineering Iâ€™ve stated that the basic principle of MDE is that "everything is a model".

Combining general purpose languages and domain specific

The MODELS series of conferences is the premier venue for the exchange of - novative technical ideas and experiences focusing on a very important new te- nical discipline: model-driven software and systems engineering.

Introduction to Model- Driven Engineering - IRISA

Model-driven engineering technologies offer a promising approach to address the inability of third-generation languages to alleviate the complexity of platforms and express domain concepts effectively.
