Maxwell's demon is a thought experiment created by the physicist James Clerk Maxwell in 1867 in which he suggested how the second law of thermodynamics might hypothetically be violated. In the thought experiment, a demon controls a small door between two chambers of gas.

I frequently see the assertion made that infrared (IR) radiation cannot warm a water body because IR only affects the skin (microns of water depth), whereas solar radiation is absorbed over water depths of meters to tens of meters.

MNT will be a game-changer in an unimaginable number of arenas, one of which is in medicine. A brain synapse is just a particular configuration of atoms, so if we have the tools to move atoms around and put them where we want, then we can perfectly "repair" a damaged synapse.
